Antivirus Used to Be Enough

Off to my favorite website. My antivirus protects me.

New malware found. Update coming soon!
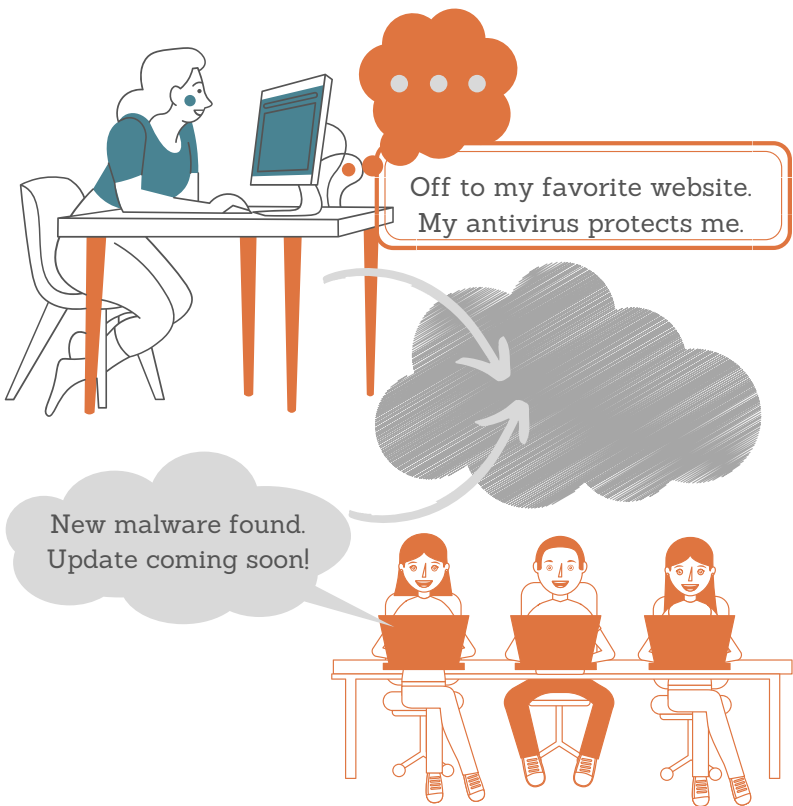

Antivirus software is reactive.

It waits for malware to be discovered, a vaccine developed, and the update downloaded to each computer. How long will that take?

This isn't the way your company can operate effectively today.

Your Company Needs More Today

Off to my favorite website. My cybersecurity team will protect me.

Website allowed? Check. Listening. Check. Learning. Check. Protecting. Check.

Real-time cybersecurity is proactive.

It continuously manages the websites your employees visit. It learns what threats are and stops them before they do harm. It doesn't wait to be told what to do next.

That's the protection your company deserves today.
